

Flowmeters & Servo Valves

Turbine Flowmeters

Our turbine flowmeters combine fast, accurate flow readings with rugged, dependable quality. Unique two-direction flow design — simply flip the flowmeter around to double its working life — flow measurements are very accurate from either direction. (Does not apply to FM2000 and FM3000).

- Connect our turbine flowmeters to any major-brand control system to enjoy superior performance and maximum accuracy.
- Smart value for your equipment budget - up to 2X the working life compared to other brands.
- Work with confidence as a Micro-Trak flowmeter precisely monitors flow of valuable liquids and NH₃.
- An ideal choice for liquid application; several stainless-steel models are also NH₃ compatible.
