NEW**

The Trak-Record™ II is a TV-remote size device to log date-and time-stamped data and system information from Micro-Trak® Systems, Inc. controllers using their standard RS-232 serial port.

The Trak-Record™ II includes a removable Industrial Duty USB Flash Drive. The Trak-Record™ II stores information to the USB Flash drive which is used to transfer data to the customer's PC.

The provided Flash Drive contains user interface software which can be downloaded to the customer's Windows XP PC via an easy ClickOnce installation procedure. The user software includes tools for data transfer, sorting and organization.

The Trak-Record™ II has a basic user interface consisting of a LCD, indicator lights, and switches for operator input and feedback.

BUILT FOR YOUR NEEDS

- Easy installation and setup
- Easy data transfer; user interface software includes data sorting tools
- Flash Drive included
- Lighted readout for night use
- Heavy-duty case; impact resistant - compact design requires minimal space
